Eat According to Your Blood Type

by Eric Carle

★★★★☆ 4 out of 5 stars

NT\$250

Dr. Carle believes that the foods people eat react with their blood types. If people follow a diet according to their blood types, they will get more energy, become healthier, and even lose weight.

1. Blood Type O

People with blood type O can digest meat and vegetables well. They should eat more beef, chicken, and fish if they want to lose weight. However, eating rice and beans isn't helpful at all.

2. Blood Type A

People with blood type A should eat more fruit and vegetables if they want to lose weight. Meat isn't digested easily in their bodies, so they should eat less meat.

3. Blood Type B

People with blood type B should eat fewer noodles because they make them fat. Meat, milk, and vegetables are good for them to lose weight.

4. Blood Type AB

Only 5% of the people around the world have blood type AB. The number is much lower than types A, B, and O. It is healthier for them to eat vegetables, fruit, and eggs to go on a diet, but they should eat less meat.

The story about Oedipus is a very miserable one. When Oedipus was born, someone told his father, “Your son will kill you one day.” Oedipus' father felt terrified when he heard that, so he took the baby Oedipus to a mountain top. The baby Oedipus was left there to die. However, a shepherd passed by and found him. Baby Oedipus was saved.

When Oedipus got older, a fortune-teller told Oedipus that he would kill his father and

marry his mother. So, he quickly left home. On the road, he met his father. Unfortunately, the two started to quarrel. At the end, Oedipus killed his father.

A few days later, Oedipus arrived in a city called Thebes. There was a dangerous monster, Sphinx, in the city. Sphinx asked people he met questions. When the person got the wrong answer, Sphinx ate him or her. Oedipus outsmarted Sphinx and saved the city. His prize was to marry the queen of the city, which was Oedipus's mother. After they found out the truth, the queen hanged herself and Oedipus blinded himself.

Everyone loves watching movies. We enjoy them in movie theaters of all shapes and sizes as well as in our own comfortable homes. It's also quite common for us to have yummy snacks like popcorn while we are watching the stories play out on our screens.

Not all movies are created the same, though. Some of them never make it to theaters even though they have wonderful stories. On the other hand, some of them are big hits at theaters even though their stories are nothing special. So, what is it that makes a movie successful? For the people that are in the movie business, the money that the movie makes at the box office is what makes it successful. They don't look at the money that the movie brings in from its home videos, being shown on TV, or tie-in products because the sales information for those aren't always easily gotten.

War movies, musicals, and historical dramas have long been the most popular kinds. However, those went out the window as soon as franchise movies came along in the 21st century. The kinds that have really won people's hearts are the ones with superheroes from Marvel Comics. *The Star Wars*, *Harry Potter*, and *Jurassic Park* franchises also have lots of fans. Even so, if you adjust the box office sales for inflation, you'll see that the old movies still stand up to what the modern world has given us.
